Welcome to Boehm-Madisen Lumber Company

Project: Client had run out of capacity on their 50 HP collector - Retrofit

Standard Alternative: Replace the dust collector at a cost of \$80,000 & 2 weeks downtime

Recommended Solution: iVEC™ Systems 16 gate IPS/Advanced System

Results:

- \$1000 monthly savings on electricity
- More capacity than Boehm can use. (Allows for added machinery ventilation in the future.)
- Noise reduction is significant

From the customer

"The utility company contacted me and asked 'Did you go out of business?' because my electric consumption dropped so significantly?" "iVEC™ saved me \$80,000 because I didn't have to purchase a new, larger dust collector that the other guys recommended."
