IVEC SOURCE CAPTURE WELD GUN VACUUM DATA SHEET

In order to select the proper welding gun for the application, we require the following operating data:

Welding Voltage:	
Welding Amperage:	
Shielding Gas:	
Wire Size:	
Wire Type: (solid or flux core or metal core)!	
Wire Feeder Manufacturer:	
Wire Feeder Model:	
Power Source: (Circle one)	STANDARD or PULSE ARC
Watts = welding voltage X welding amperage	

Please provide photograph of the weld gun connection to the welder, the back end of the current weld gun hose.
