

IVEC COMMAND CLEAN AIR. ONLY SMARTER.

Peak Performance from Peak Intelligence

On demand, remote access to your data.

INTELLIGENT VENTILATION – BY DESIGN

Harness IVEC Technology to Lower Costs & Boost Efficiency

Most manufacturers want to increase their ventilation system's effectiveness and lower its operating costs. The question is: how?

IVEC Command gives you the answer. It puts the latest monitoring technology and data analytics at your fingertips, so you're in full control of your ventilation system. You gain previously untapped capability to cut costs and consistently provide optimum air quality, from anywhere.

VENTILATION SYSTEM DATA... OPTIMIZED

Document power savings and system capacity, predict maintenance requirements, and more to run your system at peak performance:

Increase productivity and reduce downtime - Maximize the ability of preventive maintenance to thwart potential equipment failures

Troubleshoot - Identify problems quickly and automatically get the information and assistance you need to correct issues in minutes

Generate dynamic reports - Pull reports regarding the overall efficiency of the system. Get overviews of how the system is functioning and analyze energy/cost savings

Receive remote access and alerts - Access/view system metrics and receive warnings about system faults no matter where you are

Lower costs - Boost maintenance efficiency and reduce time needed for support/diagnostics

Leverage Outside Resources - Outsource maintenance to IVEC or other distributor to lower overhead and free up maintenance staff

Maximize Your System's Efficiency and Intelligence

Using IVEC Command's predictive and proactive tools, you can monitor and control your ventilation system through industry-leading sensors that verify system performance and ensure proper operation.

IVEC Command not only displays all of the controls for these sensors in one location, it also continually monitors performance to provide system analytics, predictive maintenance and customized reporting.

KEY FEATURES

Remote Monitoring / Access / Control

Data logging

Predictive metrics - Predicts filter changes, filter life, etc.

Self-diagnostic systems - Detects errors and offers solutions

Integrated IVEC support - Built-in parts ordering, operations manuals, how-to videos, technical support calls

Data security - Two-factor authentication, security audits on hardware

Automated reports displaying system performance

Automated notifications of issues / problems

A POWERFUL SOLUTION FOR MANUFACTURERS WHO

- Have zero down time
- Are short on maintenance staff
- Need verification of system performance
- Want to leverage advanced technologies to gain a competitive edge
- Wish to document their reduced energy footprint/environmental impact

TAKE COMMAND OF YOUR AIR QUALITY

Currently available for GVSC standalone, IVEC Ultra System, GVMC System, or IVEC Steward

WHY CHOOSE IVEC TO CONTROL YOUR PROCESS VENTILATION?

Because IVEC delivers customizable, highly efficient solutions that consistently save you time and money--now and over time

» IVEC WILL

- Manage energy consumption
- Add capacity
- Reduce noise
- Extend filter life
- Reduce "negative pressure" in your building
- Extend the life cycle of existing equipment
- Reduce scheduled maintenance

» IVEC SYSTEMS ARE

- UL Listed and cUL Listed
- Recommended for new or existing equipment
- Available for ducted or ambient systems
- Complete networks -- not just components and wiring
- Backed by an established, full-service company

» IVEC SYSTEMS

- Provide exhaust on-demand
- Control cleaning for self-cleaning collectors
- Monitor filter-loading and adjust to pressure changes
- Provide total automation that eliminates employee interaction and tampering
- Provide valuable analytics for management that can be monitored locally or remotely
- Monitor power consumption
- Lengthen intervals between scheduled maintenance

» IVEC REPRESENTATIVES

- Provide complete turnkey project management
- Experienced with mining, food, weld fume, wood dust, coolant mist, vehicle exhaust and many other commercial and industrial applications
- Will design a system specific to your needs - simple to sophisticated
- Backed by a company with 50+ years experience and thousands of installations
